This report is used to find out where a cohort of students has migrated in the University. The cohort plan is the plan under which the student was admitted to the University.

The CALS Fall 2009 cohort began with 338 students. By Spring 2013, 135 students (31.67%) out of that original cohort were still at CALS and likely graduating.

How Do You Track Your Students?

This dashboard set, located at Student > Curricular Flow, was created so that departments could track student migration across majors during the students’ academic careers. With the advent of RCM, colleges and departments need to be aware of where and when their students leave and enter the major(s).

Forward Curricular Flow

This report is used to find out where a cohort of students has migrated in the University. The cohort plan is the plan under which the student was admitted to the University.

The CALS Fall 2009 cohort began with 338 students. By Spring 2013, 135 students (31.67%) out of that original cohort were still at CALS and likely graduating.

Backward Curricular Flow

This report is used to identify a cohort of students in a major for a specific term, then to trace their major history backward, term by term.

Of the 1,160 students who were CoS seniors in Fall 2015, 652 of them began their academic career in CoS in Fall 2012 as full-time freshmen.
